

## Peel Hall Primary School - Mission Statement

Our "Mission Statement" was reviewed and amended in September 2018

Peel Hall is about "Working together for success." We are a welcoming, inclusive school, which is inspiring in the sense of motivational which involves challenging and supporting all stakeholders to be the best they can be; so as to develop a caring community that respects and values everyone. This is achieved through effective dialogue and communication with each other.

Within our school, it is the shared vision of the Head Teacher and the Governors that all children, their families and staff, engage fully in purposeful, fun educational activities in an inclusive environment that is happy, safe and secure, and which meets the holistic needs of all our children, resulting in them achieving the best they can in all areas.

This means our school will deliver an explicit curriculum which supports every child's academic needs, whilst ensuring through the explicit and the hidden curriculum, that each child has their social, emotional, physical and spiritual needs which includes values relevant to our society met, and which equips them with life skills to be positive contributors within our local, national and global communities.

Each aspect of both our explicit and hidden curriculum is of equal importance in order that we can help each child feel valued and develop that sense of self worth, which will help them to strive to be the best they can be.

It is the expectation that all staff are passionate about their teaching and our children develop a passion for learning so as to help them develop strong character traits of self-confidence, self-motivation and resilience.

It is an expectation that all parents are passionate about their child's/children's development and support, challenge and work with the school in a manner that is conducive to creating effective working partnerships for the benefit of the children.

We want to equip our children with the necessary life skills, which help them embrace change, accept challenge in order to improve and to contribute to their school, locality and society in general. We aim to empower lifelong learning through honesty and openness about our strengths and developmental needs.
